

Most Able Homeworks for Beauty Therapy

KS4 - Yr10's most able students - currently completing a project related to hair and beauty science, these students are targeted for Distinction level for their overall grade. Students will need to evaluate chemical composition of hair and beauty products, explain how factors affect the appearance of hair and skin types and Justify the formulation used for your cosmetic product. Homework will show links to ICT through online project work, Business studies by showing graphs, charts and formulas and Science by researching ingredients and product compositions. The hair and beauty science project will go towards part of their final grade. They should use the assignment brief to cover criteria to gain a distinction and follow information provided on show my homework.

KS4- Yr11's Most able students - This homework will be developed over the May half term, this will be a home learning project on the history of Henna how it works, how it is used, techniques and designs. By developing this project it may help students who are hoping to stay on and complete 6th form beauty as part of the course will be studying and practicing Henna techniques. Homework shows links to ICT through power point presentation.

KS5- Y12/Y13 Most able students- Extended project for students of excellence. This is an on-going project that students will complete throughout the year and provide evidence of Voluntary work, sales records, attainment records and colleague testimony. Homework will be linked to their work experience and related industry experience they have gained. From completing the student of excellence award you will gain an additional certificate which should be included on your CV for potential employers to see.
